

# Dräger X-am<sup>®</sup> 3500 Multi-Gas Detection Device

The Dräger X-am® 3500 was especially designed for clearance measurements. The 1 to 4 gas detector reliably detects flammable gases and vapours as well as O<sub>2</sub>, CO, H<sub>2</sub>S, NO<sub>2</sub> and SO<sub>2</sub>. The innovative signalling design and extensive range of accessories ensure optimum safety and easy handling.

Switch easily between pump and diffusion mode

Slots for DrägerSensors® to measure up to four gases

Glowing green D-light (optional) indicates: tested and ready for use

Easy-to-read colour display with zoom function

Inductive charging

## **Benefits**

#### Specially designed for use with a pump, optimised for clearance measurement

The Dräger X-am 3500 is equipped with a very powerful pump. It can be connected with hoses of up to 45 metres in length. A pump adapter makes it easy to switch between diffusion and pump mode at any time. This means the pump is only operated when you actually need it. That saves energy, reduces wear and tear, and thereby extends the lifespan of the pump.

Handy and durable, the Dräger X-am 3500 is intuitive to operate single-handedly using three function keys. The easy-to-read colour display clearly lays out all the information for you. Thanks to its compact and robust construction, the device can withstand even the harshest conditions.

#### Clear signalling design

The signal system of the Dräger X-am 3500 is based on a clear colour code, in accordance with the requirements of the EN 60079-29-1, EN 45544-1 and EN 50104:

- Red light = gas alarm
- Yellow light = device-related alarm, e.g. low battery
- Green light = device is ready for use

The green glow of the D-light allows you to see from a distance whether the device has been properly tested and is ready for use.

In case of an alarm, the X-am 3500 alerts you with colourful alarm LEDs, a loud horn (100 dB(A) at a distance of 30 cm), and clearly palpable vibration. Optionally, four preset hazard symbols are available for the display which explicitly indicate the presence of explosive or toxic gas hazards, for example. This allows the user to easily recognise the type of hazard based purely on the symbol displayed.

#### **Economical Fleet Management**

Bumptest and calibration are carried out simply and quickly using the Dräger X-dock® calibrating station. Its low test gas consumption keeps operating costs to a minimum.

Its reporting function and numerous other useful features make the X-dock Manager PC software a smart addition to any fleet management operation. To identify the devices in the fleet, you can either use tried and tested barcodes or an integrated RFID transponder.

#### Inductive charging protects against wear and tear

The X-am 3500 features inductive charging. This makes it easier to operate and increases the lifespan of the device. Issues like corrosion and contact problems in the charging cradle are a thing of the past. You can charge (outside of explosion-hazard zones) and measure at once, e.g, when in use inside vehicles or on machinery. The charging cradle can connect with one another, taking up minimal space, and are compatible with existing Dräger X-am® series cradles.

# Comparison of Dräger X-am® 3500 and Dräger X-am® 8000

Features Teatures	Dräger X-am® 3500	Dräger X-am® 8000
Number of measuring gases	1 to 4	1 to 7
nternal pump, activation with pump adapter	Yes	Yes, optional
nductive charging	Yes	Yes
Customer-specific settings when ordering	No	Yes
Shoulder strap included as standard	No	Yes
Catalytic bead sensor DrägerSensor® CatEx 125 PR	Yes	Yes, configurable
Electrochemical (EC) DrägerSensors®: (XS O <sub>2</sub> , XXS CO LC, XXS H <sub>2</sub> S LC, XXS NO <sub>2</sub> , XXS SO <sub>2</sub>	Yes	Yes, configurable
Electrochemical (EC) DrägerSensors®: ther sensors/special gases	No	Yes, configurable
nfrared (IR) DrägerSensors® Dual IR Ex/CO <sub>2</sub> , IR-Ex, IR-CO <sub>2</sub>	No	Yes, configurable
Photoionisation detector (PID) DrägerSensors®: PID HC, PID LC ppb	No	Yes, configurable
Automatic measurement range switching for the catalytic need sensor, catalytic bead sensor, measuring gas: methane	No	Yes, configurable
Assistant: Confined Space, Leak Search, Benzene/Pre-Tube	No	Yes, only when a pump is installed
Event report (incl. impact detection)	No	Yes, configurable
Bluetooth®1	No	Option

Dräger offers two different multi-gas detection devices with internal pump: Dräger X-am® 8000 and Dräger X-am® 3500. The different features of both devices are summarised in the table above.

## Accessories

### Inductive charger

To charge the device inductively

## Pedestal

To stand the device upright for area monitoring. The pedestal can be used with or without a shoulder strap.

#### Protective rubber boot

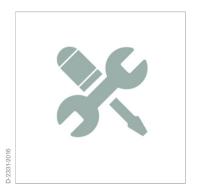

Prevents damage and wear in harsh environments. The protective boot can easily be replaced by the user.

### Shoulder strap with adhesive label

With the shoulder strap you can comfortably carry the deivce. The corresponding adhesive label can be marked individually with device specific information, e.g. sensor assortment.

## Services

#### **Product Service**

Our product service department supports you with a range of service packages – in our shops or on site in your plant. Care, servicing and maintenance are key factors when it comes to safety. Diligent maintenance and care is also absolutely necessary from an economics perspective. Preventive checks, service procedures and original replacement parts make your investment last longer.

### **Rental Service**

From bridging a temporary shortage of equipment to procuring special equipment for applications involving specific requirements: If you only need to cover a temporary higher demand, then Dräger Rental Service with over 65,000 pieces of rental equipment is an economical alternative to purchasing. Fast, straightforward and with a wide range of additional services available upon request.

#### **Training**

The Dräger Academy has imparted well-founded and practical knowledge for over 40 years. With over 110 authorized trainers and more than 600 available topics, we conduct more than 2,400 training sessions per year. We equip your employees with the knowledge required for real-life situations and ensure that the learned material can be recalled and applied reliably – in their everyday work and especially in stressful situations. To meet your needs, we are also happy to develop a customized training program specifically for you.

### **On-site Safety Service**

Whether through a rental shop, personnel services or comprehensive safety management, our On-Site Safety Services provide support in all projects where there are particular safety risks – not to mention normal day-to-day business.

# Technical Data

Dimensions (H x W x D)	179 x 77 x 42 mm		
Weight		Approx. 495 g, depending on sensor configuration, without strap, without pump	
	Approx. 550 g, depending on sensor config	uration, without strap, with pump	
Housing	Durable two-component housing		
Display	High-contrast colour display		
Temperature	-20 °C to +50 °C		
Pressure	700 to 1.300 hPa		
Relative humidity	10 to 90% (short-term up to 95%) r.h.		
Alarms	Visual	3 LED 'red' (gas alarms),	
		3 LED 'yellow' (device alarms)	
	Acoustic	Multi-tone, typically 100 dB(A) at 30 cm	
	Vibration		
Ingress protection class	IP 67		
Energy supply	Lithium-ion battery, rechargeable, inductive charging		
Operating times (Diffusion)	With CatEx and 3 EC sensors	Typically 24 hours	
	With 3 EC-sensors	Typically 120 hours	
Charging times	Typically 4 hours after use during a shift of max. 10 hours		
Start-up times	Typically <60 seconds for standard sensors		
Data storage	12 MB, e.g. at 10 minutes per hour of gas exposure with measuring values changing by		
	the second on all 4 channels: approx. 300 h	nours	
Pump operation	Max. hose length 45 m
