

# KANTECH ADVANTAGE

## PROGRAM

### Productivity “Out of the Box”

EntraPass is a robust suite of high-performance security management software that allows you to design and operate any number of doors where card access is required - securely, quickly and efficiently. EntraPass is compatible with Kantech's entire line of door controllers. As EntraPass continues to deliver new features and enhancements, it is more important than ever to have the productivity tools to effectively use this solution.

#### **Why Update or Upgrade**

Having the latest version of EntraPass provides you with new features such as wireless lock integration, Active Directory integration (LDAP) and other features or integrations that are very useful for managing your system. Kantech also maintains compatibility with the latest Windows Operating System.

#### **How to activate the Kantech Advantage Program**

You can find the KAP requirements and ordering information in the chart below to extend - by 12 months - EntraPass product updates and upgrades.

It is easy to determine the exact number of tokens required to activate the KAP by referring to the options that are installed in the EntraPass system. For EntraPass v4.x, verify the number of tokens required from the workstation by clicking on the “Options” tab and navigating to “Registration” then click on the “View EntraPass KAP (or SSA) details” button. For EntraPass v5.0 and higher, verify the number of tokens required from the workstation by clicking on the “Help” and “About” tabs then view “Tokens to update” for the required amount of tokens.

# Kantech Advantage Program Token Requirements and Ordering Information

## EntraPass Special Edition

System/Option	Details	Tokens per year
EntraPass Special Edition Base System	No option installs on Special Edition	1
