Cast Iron Housing Manual
Override Gear Operators

ILG-S PR Series Gear Operators

The Rotork Gears Series 'ILG-S PR' gear operators are designed to provide a means of manually overriding pneumatic valve actuators in power and process applications. ILG-S PR are used for spring-return actuators only. This design features a 90° slotted key drive and does not utilise a disengagement mechanism.

Application

The Rotork Gears series 'ILG-S PR' operators are used in all industries where reliable manual operation of pneumatic spring-return actuators is required. All units mount between the valve and actuator and can be supplied with an ISO drive shaft.

Features

- Protected input shaft
- Cast iron housing
- Rugged construction
- Axial needle bearings
- Light weight
- Integral top flange and ISO drive.

Options

- IP67/IP68 Enclosure
- Stainless Steel input shafts
- High and low temperature ranges
- Padlock Flange
- Flexible Extensions.

Performance Specification

- Stroke: 0 - 90°
(± 5° adjustable)
- Enclosure: Sealed to IP65
Other enclosures are available on request.
- No. of Models: 10
- Torque Range:
330 to 32,000 Nm
(2900 to 283,520 lbf.in)
- Temperature:
-20 to +120 °C
(-4 to +250 °F)
