Features That Make a Difference

- Measure your site's standard metrics and Key Performance Indicators (KPIs)
- Use in combination with C-CURE 9000's Business Intelligence Reporting Suite (BIRS) or as a standalone report solution
- Easy on site installation
- Better service your site's areas of compliance, risk management and efficiency
- Exporting of reports allows for easy presentation to security site management
- Advanced calendar filtering provides easy and precise time management
- Three (3) convenient packages to meet any size system

Robust Reporting Solution

Tyco Visual Intelligence, powered by SecureVizual, is designed for end users with any size security system, who are looking for metrics and Key Performance Indicator (KPI) measurements for their security infrastructure. This streamlined reporting solution provides a detailed dashboard for monitoring all areas of the security site through extensive reports that measure the sites personnel, visitors and overall efficiency.

Web-Based Graphical Interface

Built directly into the C-CURE 9000 SQL database, Tyco Visual Intelligence provides deep reporting that is displayed in a user-friendly, browser-based dashboard on the administrator station. The scorecard widgets provide detailed information that can be used to facilitate a site's overall evaluation.

Measure Your Site Against Industry Standards

Now with advanced calendar filtering, you can set industry thresholds to measure the daily site activity against industry standards. Utilize these report results to make informed management decisions on the optimization of personnel on site or help support additional sitewide training.
